Merry Christmas & Happy New Year

THE PRESIDENTS CHANNEL

FRANK MOSKOWITZ

DECEMBER SLOW ROLL PRESIDENTS LETTER

Welcome to December's Slow Roll. This year sure went fast! We finish our year off with the **SVF Fun Fly**. **This is a one day event and is for SVF members only.** It will take place on **Saturday December 11th. Lots and lots of prizes.** A nice added attraction this year will be a Swap Meet. If you want to get rid of or add to your collection of airplanes, then I recommend you bring a table for your items you are selling. Tables at the swap meet will be \$10.00 for nonmembers and free for members. Don't use the tables under the Ramada since our pilots will be requiring them. **Charlie Beverson** is the lead on this one.

We need more intro pilot instructors and certainly full time instructors to help with new members that we are sure to attract this coming year. Please feel free to email me or call me and I will give you all the details on how to become an instructor. **The club now has a trainer. It's an LT 40 Cadet electric.** **Contact John Geyer for info on this.**

This year has been really great. The coming year will be even better. The entire Sun Valley membership should be proud to belong to such a great organization. I would like to close this month's article by wishing all a wonderful holiday season. Whatever holiday you celebrate, may it be filled with good health and happiness and the promise of a great new year.

Don't forget to mark the first Wednesday of each month on your calendar for our club meetings. Our next meeting is **Wednesday December 1st at 7:00 pm** Location is **Deer Valley Airport Restaurant.** (7th avenue and Deer Valley Road). **Arrive a little earlier** and enjoy some of their great food choices. **Lots of great food and a smoke free environment.** The Club meetings get better every month. For added fun we have show and tell. We will always have more than one raffle prize and the 50/50 could make you very happy \$\$\$\$. You never know what might happen, and you don't want to miss it. Have fun out there!

Frank Moskowitz

President

SVF MEMBERS ONLY
FUN FLY
 Saturday
DECEMBER 11, 2010

Lot's of Prizes
 All **EVENTS** will be announce at the field

So come on out and have some FUN
9AM TILL ??

With the FUN FLY a
SWAP SHOP
 for all the goodies you want to Trade or Sell
 (It may be wise to bring a table for your items you are selling)
NON-MEMBERS MAY SELL/SWAP \$10.00 Donation

We would like to have the Ramada tables available
 for the **EVENT** pilots airplanes/ helicopters

Our snack bar will be open for food and
drinks

SVF MEETING DECEMBER 1, 2010 AT
7:00 PM @ D V AIRPORT

Sun Valley Fliers Club Meeting Minutes Date November 3, 2010

The meeting was called to order at 7:00 pm by **Vice President Tony Quist**. There were 24 members in attendance.

Board members in attendance: **Ron Thomas, Charlie Beverson,**

Guests: none

New Members: none

New Solo Pilot: none

Secretary's Report: Rusty Fried. Voted and approves as published

Treasurer's Report: Gene Peterson. Voted and approved as presented at the meeting.
137 renewals for 2011 as of this meeting.

Safety Officer Report: People are trying to announce take off and landing however some people are not loud enough. We are still having problems with cigarette butts being tossed on the ground, please police your butts and trash. Thank you.

Old Business:

1. 1/8 Air Force had 97 pilots at their last events. All went well with no problems.

New Business:

1. Charlie's fun fly is going well. December 11, 2010. 2 events slow park flyers will not work well. Tables at the swap meet are \$10.00 for no members and free for members.
2. Club trainer: The club now has a club trainer. LT 40 cadet electric. We paid about 150.00 less batteries. We are waiting to get battery packs.
3. E fly October 13, 2010, John Geyer is CD. Everything is going good.
4. November 21 we will host cub scouts and on the 18 December we will host a few boy scouts.

Door Prize Winners: Fuel Paul DeLawder, Fuel Howard Kennedy, Fuel Lou Pfeifer Sr.
Fuel Jim Goessling, Glue Lou Pfeifer, Glue Rusty Fried

50/50 Drawing Winner: Aeriana Perkins won. \$42.00 congratulations.

Show & Tell: **Bernie Frank** brought a *Fantasy Racer* from ZD Fly. Foam looks real good.

Val Rouquine brought a Hanger 9 Spitfire for sale @ **\$395.00 ready to go**. Good deal.

Meeting adjourned at: 7::20pm

Rusty Fried, Secretary

Rusty Fried, Secretary

\$ TREASURERS REPORT \$ with *Gene Peterson*

Treasurer's Report December/January

150 of you should have your new 2011 sticker in the mail these past weeks. If you have paid and/or sent back your bill, I have all I have received turned around and sent out. Soooooooooooooo if you didn't get your sticker, email me back, az49er@cox.net or call (602) 579-0925 and we'll figure out why.

Don't forget the new gate code on the front of your receipt (in RED). New code effective Jan 1. (If you get there to fly on Jan 1, try old code if new one doesn't work). I am not going out to the field and change the code at 12:01 AM ha ha.

A lot of members are putting a mailing label on the back of their AMA card and writing the new code there. Not a bad idea.

Looking forward to Charlies Fun Fly on the 11th. See you there.

Merry Christmas and **Happy New Year** if I don't see you.....

Regards, *Gene Peterson, Treasurer*

SVF 10th Annual Electric Turkey Fly-In

By John Geyer

The 2010 version of our annual fundraising electric fly-in was a complete success, thanks to the usual volunteers: **Bob Bayless, Charlie Beverson, Howard Kennedy, Tony Quist, Jay Steward, and Ron Thomas** doing his usual great job running the kitchen. I'd also like to thank our Phantom Judges and all the SVF members who supported the event. We had 31 registered pilots and took in \$750 for the Boys and Girls Clubs of Metropolitan Phoenix. Everyone had fun and we had no safety issues or lost airplanes throughout the event.

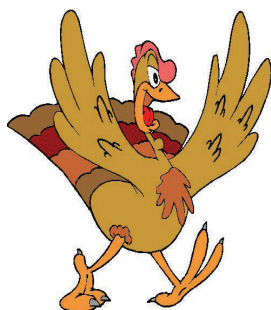

Steve Tillson donated a bunch of APC Props and Du-Bro wheels that we gave out at registration and we had enough additional donations to give every registered pilot a merchandise award – everything from hand tools and hardware to several airplane/helicopter kits and a 6-channel Hitec Radio. Please check out the list of sponsors and try and return their support when its time to spend some hobby dollars.

We had a great bunch of airplanes as well, both in quality and diversity of aircraft. I was especially happy to have a very nice scale helicopter – **David Zarra's excellent Jet Ranger**. Check out the photos and results and, if you weren't there, please make sure you don't miss next year's event. It's great fun, supporting a great cause.

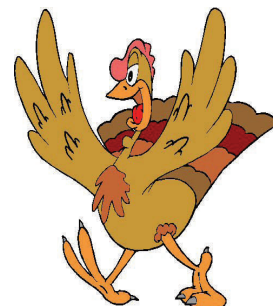

John Geyer

JUDGES RESULTS

Best Civilian Scale	Howard DGA – John Reichart
Best Military Scale	P-47 Thunderbolt – Gary Porter
Best Multi-Engine	No Multi-Engine Aircraft Flew
Best Multi-wing	Sopwith Camel – Howard Buxton

Cheap Model Airplanes From Builders' Cast-Offs

Once you have mastered the basics of building a model airplane and have a few spare bits lying around your workshop it becomes very easy to produce your very own design of plastic model airplane. Simple Plastic Airplane Design (SPAD) is a really cheap and fun alternative to constructing expensive remote-controlled model airplanes kits.

The concept of SPAD started in the late 1990's and has evolved into a highly detailed and solid method for building RC model airplanes. While using traditional building materials and techniques can take weeks or months to put an airplane together, applying the SPAD concept can reduce the build time down to days, or even hours. SPAD materials are widely available and are less expensive than those used in standard model airplane kits. Plans and help for building a SPAD can be found online and are completely free. The best part about flying a SPAD is its survivability when it comes to the inevitable crashes as your enthusiasm gets away from you!

The basic RC model airplane SPAD concept revolves around using inexpensive building materials that can be found at local hardware stores and sign shops—or even picked up for nothing from builders' cast-offs. While the materials required for constructing a SPAD vary from one design to another, the basic materials used include PCV downspout pipe for the fuselage, **Coro-Plast (corrugated plastic) sign material for the wings and controls surfaces, (The next election will have many Coro-Plast signs out there)**. HDPE cutting boards for firewalls and landing gear blocks, and CA (superglue) to hold everything together.

Because of the simplicity involved in putting a SPAD RC model airplane together, even an inexperienced modeler can complete the job in a single weekend. A basic fuselage made from PVC downspout can be made in a matter of minutes, CoroPlast wings and control surfaces in just a few hours, and all the miscellaneous parts to complete the project in just a few hours more. Acquiring the materials needed for a RC model airplane SPAD project may require no more than a trip to the local hardware store and a few phone calls to local sign shops.

Aside from these readily available materials, there are a few other items that you will need: self-tapping sheet metal screws, zip ties, a utility knife, and a few wood sticks (4mm x 27mm x 1m pine lathing/lattice). Other items needed to complete your RC model airplane, such as wheels, landing gear, and control arms, will need to be fabricated or purchased from your favorite hobby store.

Plans for building a SPAD RC model airplane are available online, free of charge, from many different sources. SpadToTheBone.com, the original home for the RC model airplane SPAD concept, has plans to suit just about anyone. From the ever popular trainer called the Debonair, to the more sophisticated Coro Edge 540 sport/fun-fly model. A community has been built around the RC model airplane SPAD concept at www.SpadWorld.net where model builders from all over the globe help each other learn better and more exciting ways to make SPADs.

One of the greatest benefits to building with the RC model airplane SPAD materials is just how tough they are. Whether you're trying a new aerobatic maneuver and just can't seem to pull out of it, or just learning to take off for the first time and cartwheel your airplane down the runway, the chances that your airplane will survive are good. Compared to easily breakable balsa, plastic is a forgiving material that can survive higher impact speeds without damage—and is easily fixed when broken.

Ease of construction, low cost, and survivability all add up to a package that encourages modelers to experiment with design concepts and methods that extend the envelope of their experience and knowledge. Why not give it a go yourself? *From Wings R/C Club, Les Mars, Iowa*

WINGS OVER ARIZONA 2010

The Arizona Model Aviators # 770

IMAA GIANT SCALE FLY-IN

December 4th & 5th, 2010

Location: Superstition Airpark, Mesa AZ

- + IMAA Guidelines apply to all aircraft. No exceptions.
 - + 80" Monoplane, 60" Biplane, Planes Can Be True Quarter Scale, Jets Must Have a Combined Wingspan & Length of 140"
 - + Just come, fly and have a good time.
 - + Food will be available Saturday and Sunday.
 - + Plaques will be awarded for different categories.
 - + **Planes Must Fly To Qualify For Any Plaques.**
 - + Landing fee \$20 for as many planes as you bring.
 - + Pre-registration is recommended. Registration Sat. 7:30 AM.
Flying starts at 8:30 AM Sat. & 7:00 AM Sunday
 - + Pilot's Parking & Saturday night Pizza Party is included in the Landing Fee.
 - + Public Parking is \$6.00 per car.
 - + No Overnight Camping Allowed At The Airfield. Trailers may be left overnight.
Security will be provided the club.
 - + Proof of AMA & IMAA membership required. For Turbines, an AMA Turbine waiver will be required.
 - + IMAA Applications Will Be Available At Registration.
